A.K. Singh and G.R. Thorpe	A general formula for numerical integration of a function	1
Anand P. Singh and J.L. Sharma	On Factorization of Meromorphic Functions	9
Ashok Kumar Gupta and Ashok Kumar Mittal	Computation of the largest real root of any integer monic polynomial using replacement sequences	17
B.S. Jaiswal and V.M. Soundalgekar	Transient convective flow past an infinite vertical oscillating plate with temperature gradient dependent heat source	25
J.L. Lopez Bonilla, V. Gaftoi and G. Ovando	Gaussian curvature as an exact divergence and Gauss- bonnet's theorem	31
J.M. Khalagai and M.O.A.E. Otieno	On quasiaffinity and quasiaffine inverses of partial isometries	35
P.N. Natarajan and V. Srinivasan	On generalized Norlund methods in non-archimedean fields	43
Rajeev Taneja and N.C. Jain	MHD flow past an oscillating magnetised plate in- slip flow regime	47
R.B. Patel	Some properties of b-vex functions	59
Terrance Quinn	From Schrodinger to Dirac: A study of relations and Statistics.	69
